- **Cisco China: 10th Anniversary**
- **CANS Cisco: 5th event running**

- **Current**

Shanghai Research Center

Cernet – Cisco Research program

Context of Advanced Networks

Shanghai Research Center

Cisco.com

- **Already open**
- **Move to permanent facility in Q3 2004**
- **Growing to staff of 100**

- **\$32 million investment in research center**
- **Part of \$250 million**

CERNET + Cisco Research Program (CCRP)

Cisco.com

- **Modeled on Cisco's existing University Research Program**
 - Similar to National Science Foundation granting process
 - Specific to China and jointly directed by Cisco and CERNET affiliated researchers
- **Program to encourage broader cooperation**
 - Goal is to have around 25-30 submittals which result in 4-7 funded research projects in first year
- **Next round will open on Dec 13**
 - Targets specific network research over CERNET
 - Suggested topics cover a broad range

Context of Advanced Networks

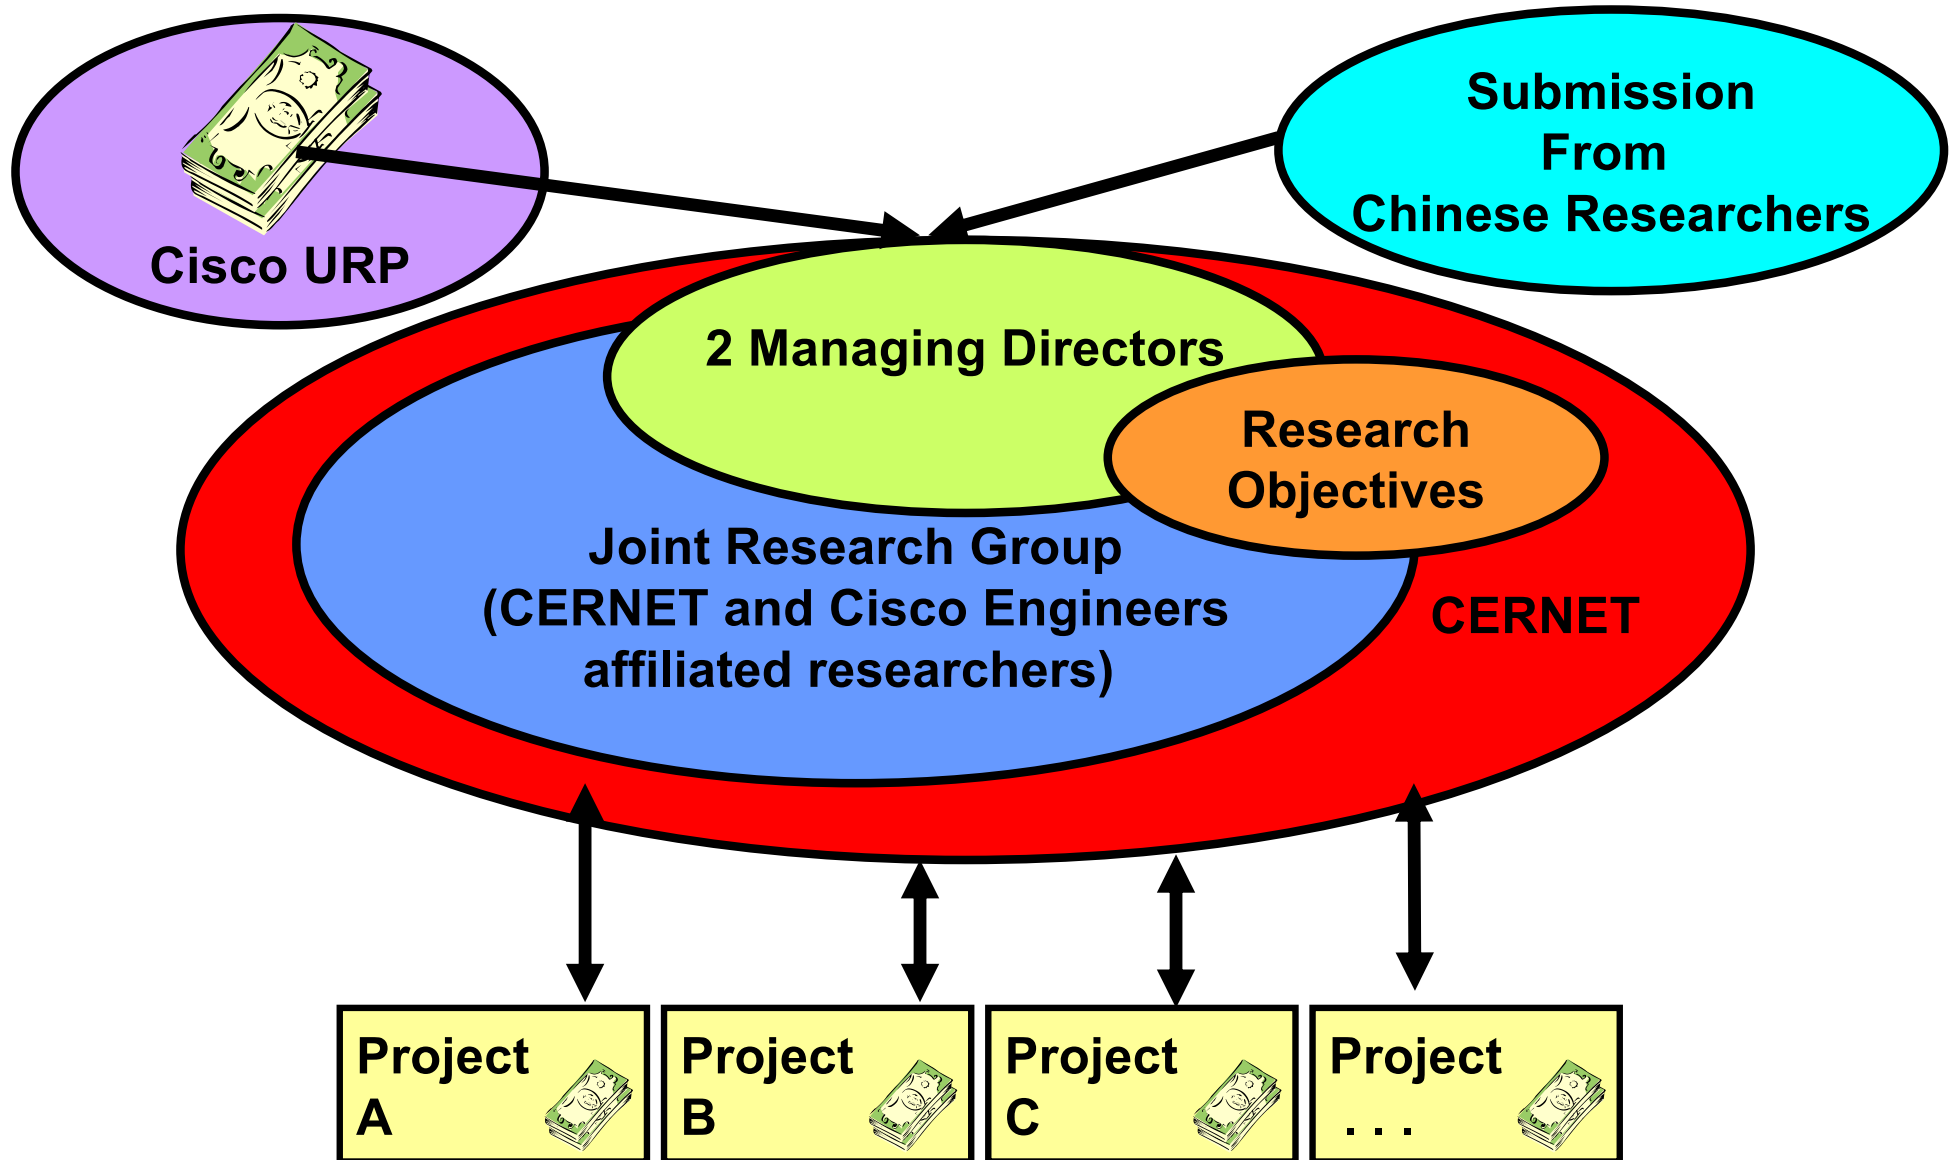

Suggestion Topics for Study

Cisco.com

- **IPv6**
 - Multicast
 - Security
- **Real Time applications with special networking needs**
 - Voice-over-IP
 - Video-over-IP
- **Network control models**
 - Network management
 - Measurement/analysis
- **Wireless LANs and WANS**
 - Mobility

Logical Structure – Virtual Organization

Grant Details

Cisco.com

- **Awards are in cash**
 - Equipment request will be considered separately by Cisco
- **Estimated size of awards are in the \$10-100K range**
- **Require twice a year reporting back to research working group**
- **Intellectual Property Rights**
 - Principal Research Investigator retains rights
- **End goal is to have open, publishable results**
 - Academic publications
 - IETF standards

Proposal Evaluation Criteria

Cisco.com

- **Intellectual merits of proposed research**
- **Qualification of Principal Research Investigator(s)**
- **Relevance/importance of research topic**

Submission Information

Cisco.com

- **Proposal Submission**

Cisco's CRS-1 Passes Our Test

As the first commercially shipping router sporting OC768 interfaces, the Cisco Systems, Inc. CRS-1 Carrier Routing System is living up to its billing, according to results of a test commissioned by Light Reading.

The router passed its first-ever independent test with flying colors.

Closing Thoughts: Success in the Information Age

Cisco.com

“Bandwidth” and “degree of connectivity” are the new measures of power...

Three distinguishing factors to harness power

- **culture to exploit & share knowledge**
- **competitive setting that embraces change**
- **ability to partner**
