

# Promoting Global Collaborations through Cyberinfrastructure

## Pacific Rim Application and Grid Middleware Assembly

Peter Arzberger  
Philip Papadopoulos

Chinese American Networking Symposium  
1 December 2004

# PRAGMA's Founding Motivations

- Science is an intrinsically global activity

*IVOA*

- The grid is transforming computing and collaboration

**e-Science Core Programme**

The UK  
**Research  
Councils**

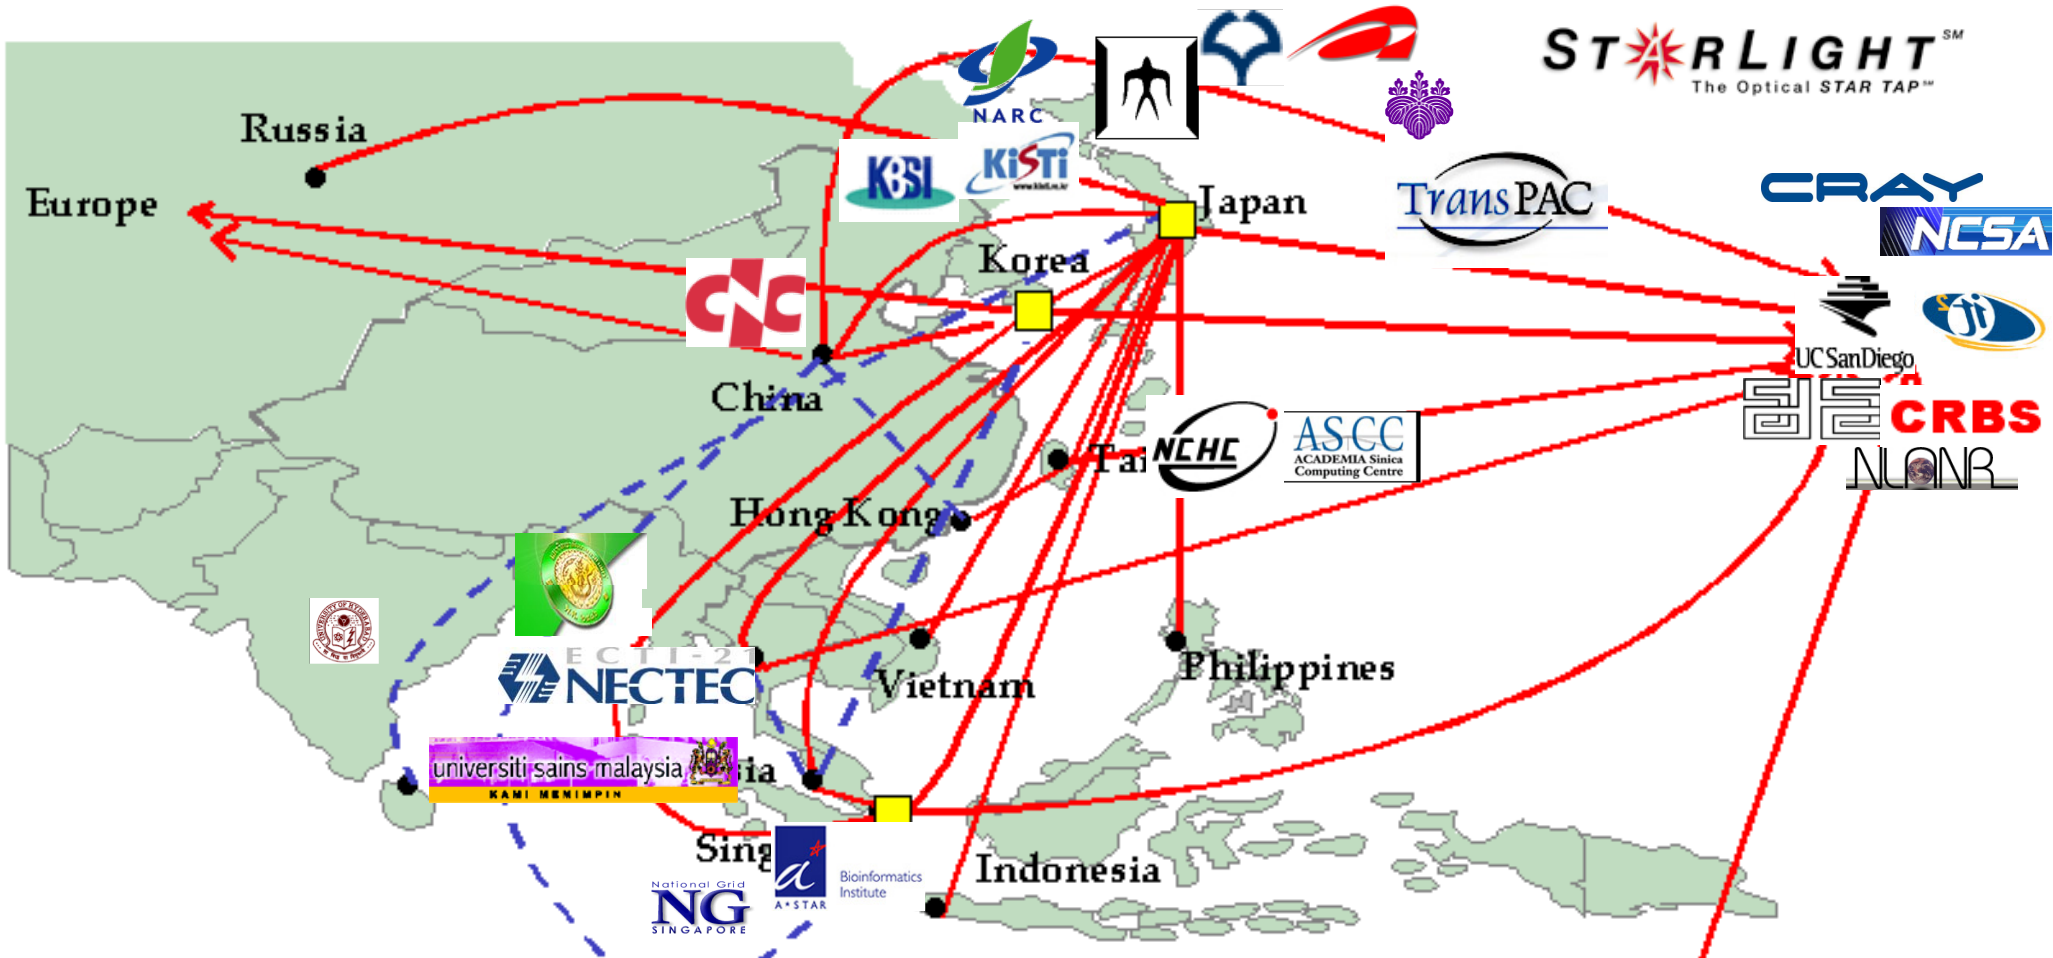

- The problem remains that the grid is too hard to use

- Middleware software needs to interoperate

# PRAGMA PARTNERS

- Access Point
- Exchange Point
- Current Status
- 2003 (plan)

Asia-Pacific Advanced Network

Affiliate Member

Australia

# PRAGMA

## Overarching Goals

Establish sustained collaborations

and

Advance the use of the grid technologies for applications

among a community of investigators working with leading institutions around the Pacific

Rim

Working closely with established activities that promote grid activities or the underlying infrastructure, both in the Pacific Rim and globally.

# Accomplishments:

## *Achieving Success through Partnership*

- Telescience: KBSI, Software for camera
- Computational Chemistry: Nimrod/GAMESS- APBS/Kepler (ligand protein docking)
- EcoGrid and Lake Metabolism
  - Prototype International Lake Observatory
  - Coral Reef Sensing
  - Meeting on 20 -21 September 2004 (plan global lake observatory network; link coral reef experts)
  - Follow-on meeting March 2005
- Gfarm and iGAP
  - Middleware Integration
  - Proteome Analysis
- Bandwidth Challenge Awards from SC03
  - Distributed Infrastructure (Gfarm)
  - Application (Telescience)
- Middleware Interoperability
  - Rock Rolls, Ninf-G, Gfarm
  - KRocks [krocks.cluster.or.kr](http://krocks.cluster.or.kr)

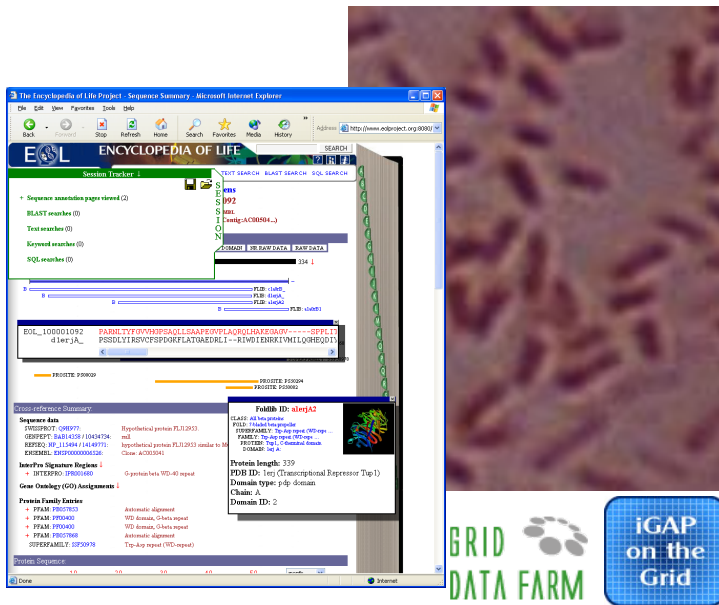

**KROCK 3.3.0**  
**22 Nov 04**

# A collaborative effort in the fight against bio-terrorism

- Gfarm makes it possible to use iGAP to analyze the complete proteome (available 9/28/04) of the bacteria, *Burkholderia mallei*, a known biothreat agent, on distributed international resources.
- This is a collaboration under PRAGMA and the data is available through <http://eol.edsc.edu>.

# PRIME:

*Preparing Undergraduates for the Global Workforce*  
*Gabriele Wienhausen, Linda Feldman, Peter Arzberger*

Monash University - Australia  
Osaka University - Japan  
NCHC and NCREE - Taiwan

UC San Diego

***Expanding PRAGMA Collaborations,  
Applications, and Successes***

# Distance Training – Project Based

- First activity with CNIC and UCSD
- Topic: Web Services – focused on climate data
- Language: Chinese
- 20 Researchers in CNIC
- <http://www.cnic.ac.cn/news/fresh/200403250006.html>
- <http://www.cas.ac.cn/html/Dir/2004/03/25/6019.htm>

# Working Groups: Integrating PRAGMA's Diversity

- Telescience – including Ecogrid
- Biological Sciences:
  - Proteome Analysis using iGAP in Gfarm
- Data Computing
  - Online Data Processing of KEKB/Belle Experimentation in Gfarm

## Nanwan eco-grid monitors undersea activity

By Chiu Yu-tzu  
 STAFF REPORTER, IN PINGTUNG  
 Monday, Oct 25, 2004, Page 2

Taiwan's eco-grid system has successfully extended its coverage from the land to the sea, further facilitating the sharing of the data contained in ecological studies with local scientists' counterparts in the rest of the world.

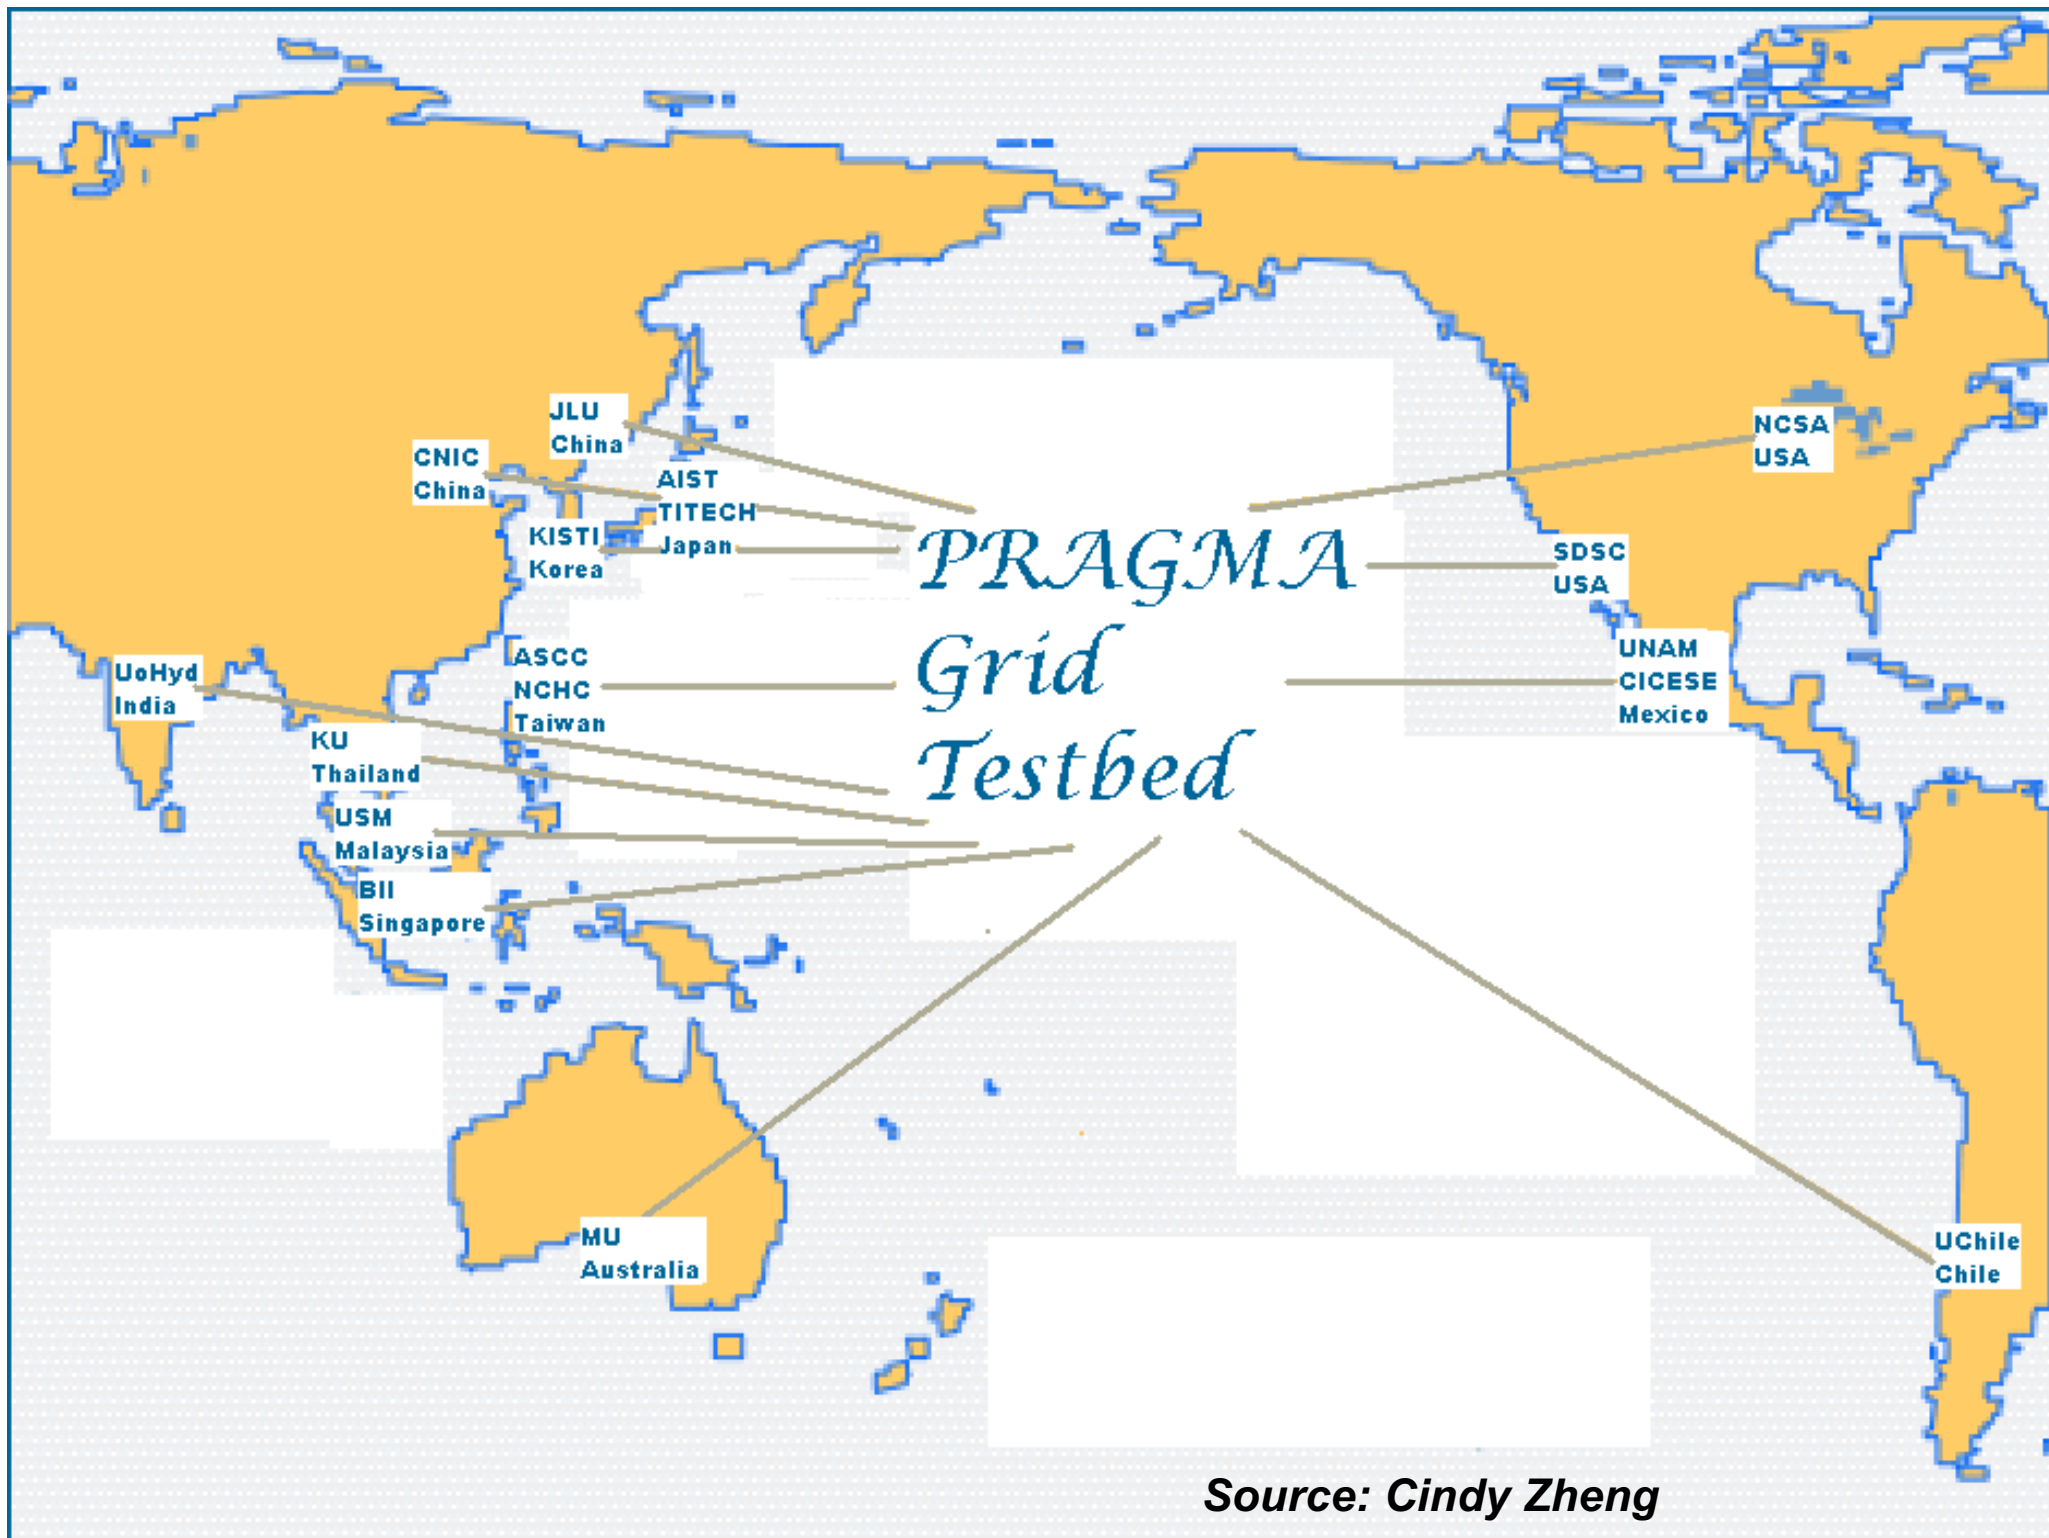

In Nanwan, a small bay north of the resort town of Kenting in southern Pingtung County, about 7m to 8m underneath a set of buoyant balls floating beside the Third Nuclear Power Plant's cold seawater intake system, a real-time set of monitors using nine sensitive cameras monitors marine ecological systems.

Tourists at the National Museum of Marine Biology and Aquarium listen to an interpreter, who explains the habits of a 4.2m female whaleshark. The whaleshark is thus

All data collected by the cameras is first digitized and then transmitted wirelessly to receivers in a control room at the power plant, through which it is then distributed via ADSL to the National Center for High-Performance Computing (NCHC).

# The PRAGMA Steering Committee

# The Central Issue

## Collaborations -

The foundation for global Grid

*Source: Cindy Zheng*

## Interoperability -

Involves people – starts with trust

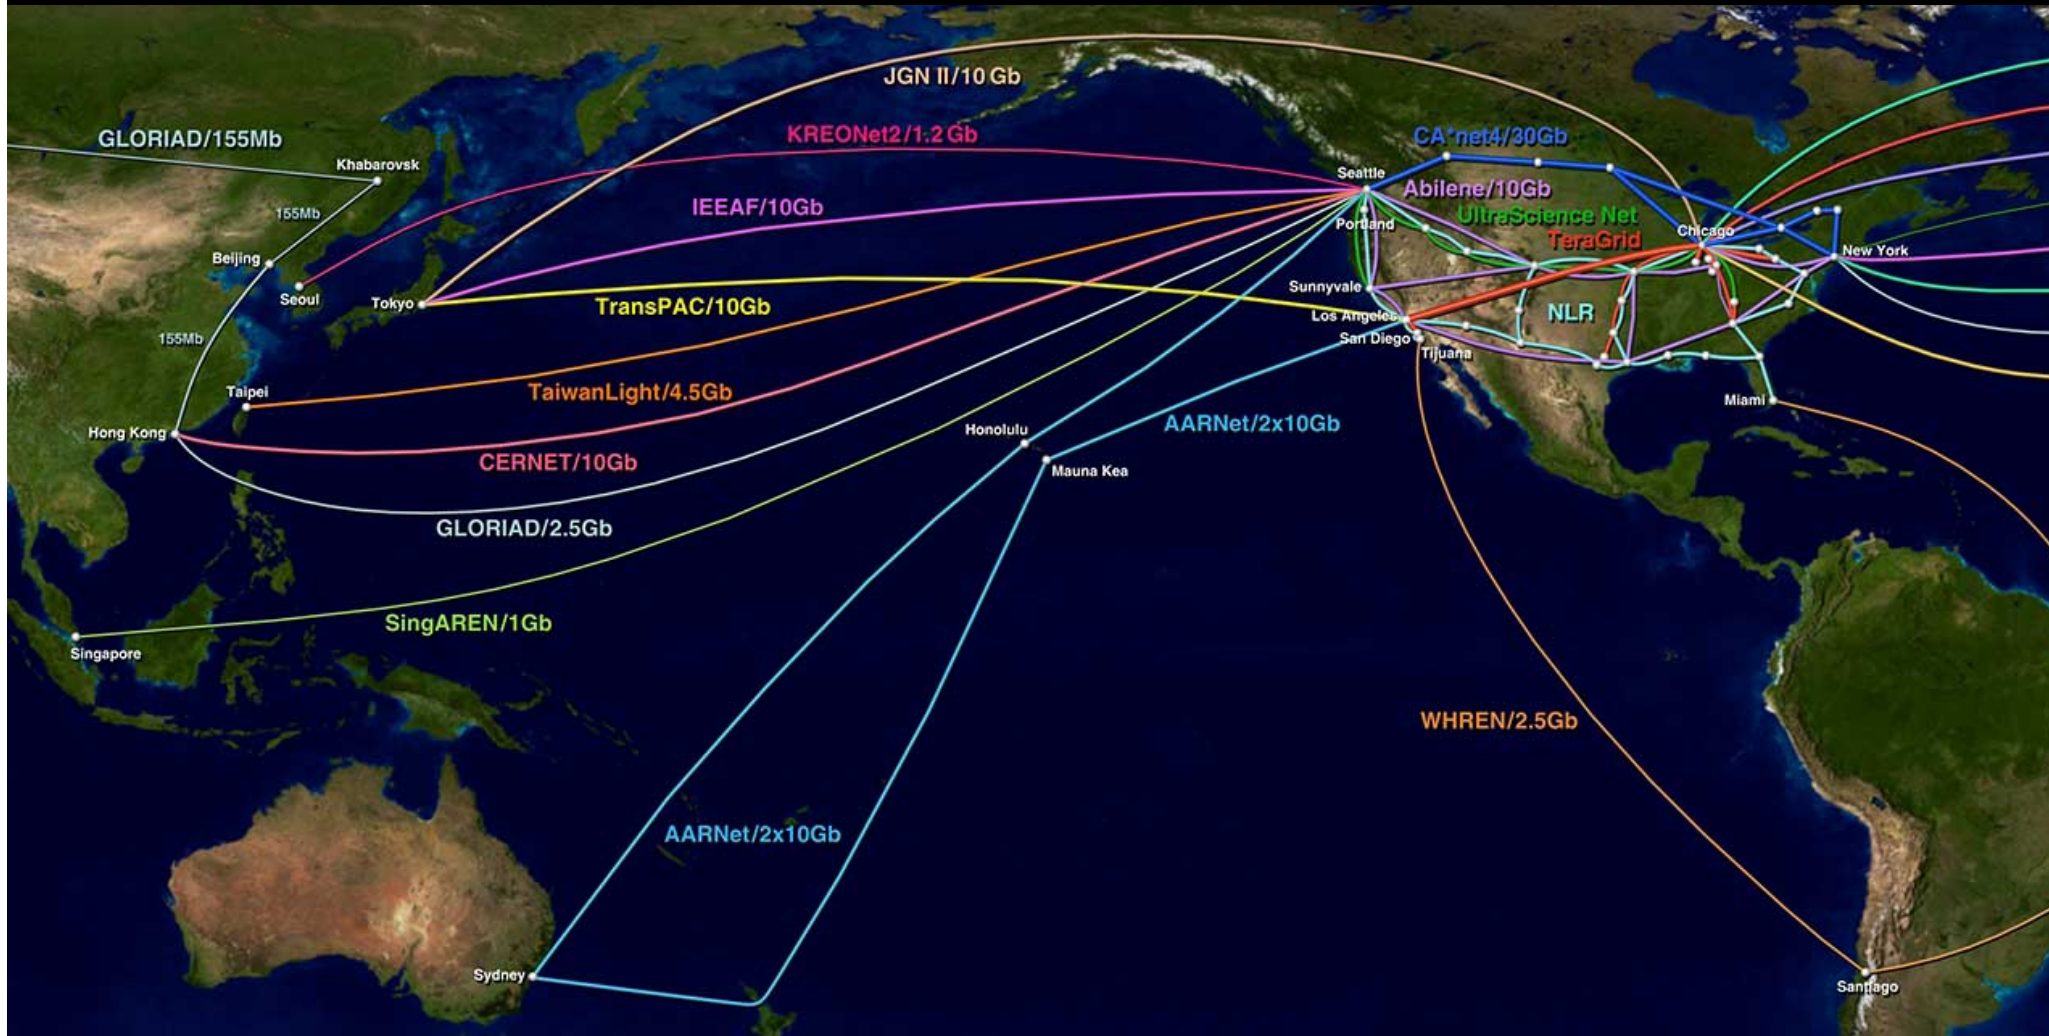

## *TransPAC2*

Building on the success of TransPAC, TransPAC2 will further expand research and education access to high-performance connectivity between the US and Asia. In partnership with our friends in Asia, TransPAC2 will make possible an intra-Asia network backbone from Tokyo to Hong Kong to Singapore. Not only supporting research and education collaborations between Asia and the US, TransPAC2 will also focus on such network research challenges as end-to-end performance measurement and security.

# Global Lambda Integrated Facility

Predicted Bandwidth for Scheduled Experiments, December 2004

# National Laboratory for Applied Network Research

- **NLANR Measurement and Network Analysis Group**
  - Passive Measurement and Analysis (PMA):
    - Passive header trace data to study workload profiles
  - Active Measurement Project (AMP):
    - Full mesh (each monitor testing to all the others) between the approximately 150 active monitors
    - Across all sites, round trip time (RTT), packet loss, topology, and throughput (user/event driven) are currently measured.
- **CNIC hosts monitor**
- **Upcoming release of new AMP software**
- **Contact Ronn Ritke, [rritke@nlanr.net](mailto:rritke@nlanr.net)**

# Opportunities Postdocs and Graduate Student

- National Science Foundation (NSF)
  - International Research Fellowship Program (IRFP)
  - East Asia Pacific Summer Institute (EAPSI)
- Japan Society for the Promotion of Science (JSPS)
  - JSPS Postdoctoral Fellowship
- Korean Science and Engineering Foundation (KOSEF)
  - APEC Post-doctoral Fellowship in Science and Engineering

**2005**

**Graduate Research Summer Institutes**

Become an internationally experienced researcher. Spend eight weeks conducting research and experiencing life in:

**Australia, China, Japan, Korea or Taiwan**

For U.S. Graduate Students in

- Biological Sciences
- Education and Human Resources
- Computer and Information Science and Engineering
- Engineering
- Geosciences
- Mathematical and Physical Sciences
- Polar Research
- Social, Behavioral, and Economic Sciences

**Application deadline: December 10, 2004**

**[www.nsf.gov/pubsys/ods/getpub.cfm?nsf03608](http://www.nsf.gov/pubsys/ods/getpub.cfm?nsf03608)**

 Sponsored by the U.S. National Science Foundation  
email: [eapinfo@nsf.gov](mailto:eapinfo@nsf.gov)

# Summary

- Dream big – build the imagination of those involved
- Start small - build trust
- Stay concrete – build infrastructure
- Focus on people – build community
  
- Opportunities:
  - Networking and Measurements
  - Testbed: Mutual learning
  - Applications: Geosciences, Astronomy, Ecology, Biomedicine, ...
  - Exchange: Undergraduates and Graduates
  - Participate in Meetings and between meetings

# Future Workshops

- PRAGMA 8

- BII and NGO

- Chair: Larry Ang,
    - Co-Chair Arun Agarwal
    - Dates: **2 May 2005 – Reception**
      - **Meeting 3, 4 May 2005**
    - Grid Asia 2005 (2 – 6 May)

- PRAGMA 9

- University Hyderabad

- Chair: Arun Agarwal
    - Dates: **20 October 2005 – Reception**

- **Meeting 21-22 October 2005**

Thank you
