

# NASA and the International Space Station (ISS) ISS Remote Science Operations Concept

- ISS status
- ISS remote payload operations

# ***ISS Accomplishments***

**INTERNATIONAL  
SPACE STATION**

# ***ISS Architecture***

A photograph of the International Space Station (ISS) in orbit against a black background. The station's complex structure, including various modules, solar panel arrays, and the long truss structure, is illuminated by a bright light source, likely the Sun, creating a high-contrast scene. The solar panels are particularly prominent, appearing as long, horizontal strips of golden-brown grid patterns.

***The fundamental architecture of ISS has 3 key drivers:***

- Humans are involved***
- International Ownership***
- Long term investment in broad based research capabilities***

**NASDA**  
宇宙開発事業団

**5 Space agencies  
own the ISS,**

**16 nations have their own  
reasons to put people and  
hardware in space**

**esa**

# *ISS will employ 5 Launch Vehicles from 4 Partners*

***Shuttle***

***Proton***

***Soyuz***

***Ariane  
& ATV***

***HIIA &  
HTV***

# ***ISS***

## ***Our Vision***

A human outpost in space  
bringing nations together for  
the benefit of life on Earth . . .  
and beyond.

We will make revolutionary  
discoveries and establish  
the permanent international  
presence of humans in space  
to advance the exploration  
of our solar system and  
enable commerce in space.

# ***Permanent Habitation***

Expedition One arrives on the first Soyuz flight, beginning permanent habitation of ISS. Life support is provided by the Service Module “*Zvezda*.” The crew activates the primary station, and awaits the addition of power and other critical capabilities.

**ISS-2R (Soyuz)  
October 31, 2000**

# ***One Huge International Space Flight Team connected on 3 Continents”***

# ***RUSSIA's Control and Training Centers***

***Service module mock up –

Neutral Buoyancy Lab**

# ISS Remote Science Operations Concept

## How do you start?

- Start by Principal Investigators (PI), Co PIs and researchers contacting and agreeing at the science level
- Science teams are not distracted by the technology implementations that are required to operate their on board experiments and conduct science remotely
- Since the tools exist!

# ISS Remote Science Operations Concept

## Remote Ops Tools

- Telescience Resource Kit

- Internet Voice Distribution System
- ISS Downlink Video
- Networking

# ISS Remote Science Operations Concept

- Telemetry
  - Receive, process, display, monitor, record, forward, and playback telemetry data
- Commanding
  - Update, uplink, and track commands
- Telemetry and Command Databases
  - Can be configured and modified by the user
- Application Programming Interface
  - Can be used with commercial software products to create user-developed software programs that work with telemetry and commands
- On a PC based system for less than \$8K

# ISS Remote Science Operations Concept

## Click to Talk Button

enables user microphone when depressed. (Also Space Bar works.)

Talk Radio Button indicates user has selected conference for talking. Only one Talk Radio Button can be selected at a time. If user has "monitor only" privileges, talk radio button is disabled.

## Conference Color

Red - Operational Conference  
Blue - Simulation Conference

## Activity Indicator

Green LED ON indicates loop is connected. Red LED FLASHING indicates activity. LED OFF indicates loop is disconnected.

Act.	Conference	Talk	Mute	Vol.	Volume	
Green LED ON	10 DMC Ops	<input checked="" type="radio"/>	<input type="checkbox"/>	237	<input type="text"/>	Disconnect
Green LED ON	12 PAYCOM Ops	<input type="radio"/>	<input checked="" type="checkbox"/>	52	<input type="text"/>	Disconnect
Green LED ON	40 DMC Sim	<input type="radio"/>	<input type="checkbox"/>	104	<input type="text"/>	Disconnect
Green LED ON	11 ISS FD Ops	<input type="radio"/>	<input type="checkbox"/>	168	<input type="text"/>	Disconnect
Grey LED OFF	Select a Conference	<input type="radio"/>	<input checked="" type="checkbox"/>	75	<input type="text"/>	Connect
Grey LED OFF	Select a Conference	<input type="radio"/>	<input checked="" type="checkbox"/>	92	<input type="text"/>	Connect
Grey LED OFF	Select a Conference	<input type="radio"/>	<input checked="" type="checkbox"/>	139	<input type="text"/>	Connect
Grey LED OFF	Select a Conference	<input type="radio"/>	<input checked="" type="checkbox"/>	110	<input type="text"/>	Connect

## IVoDS User Interface

(Zero Cost to the User)

### User must be assigned access to conferences by Administrator

Administrator specifies the set of conferences to be made available to user when User Account is created or modified. User can talk on one conference, monitor up to 8 conferences simultaneously, depending on bandwidth and quality of connection.
