REUNA3
Gigabit Backbone Project

Project Goals

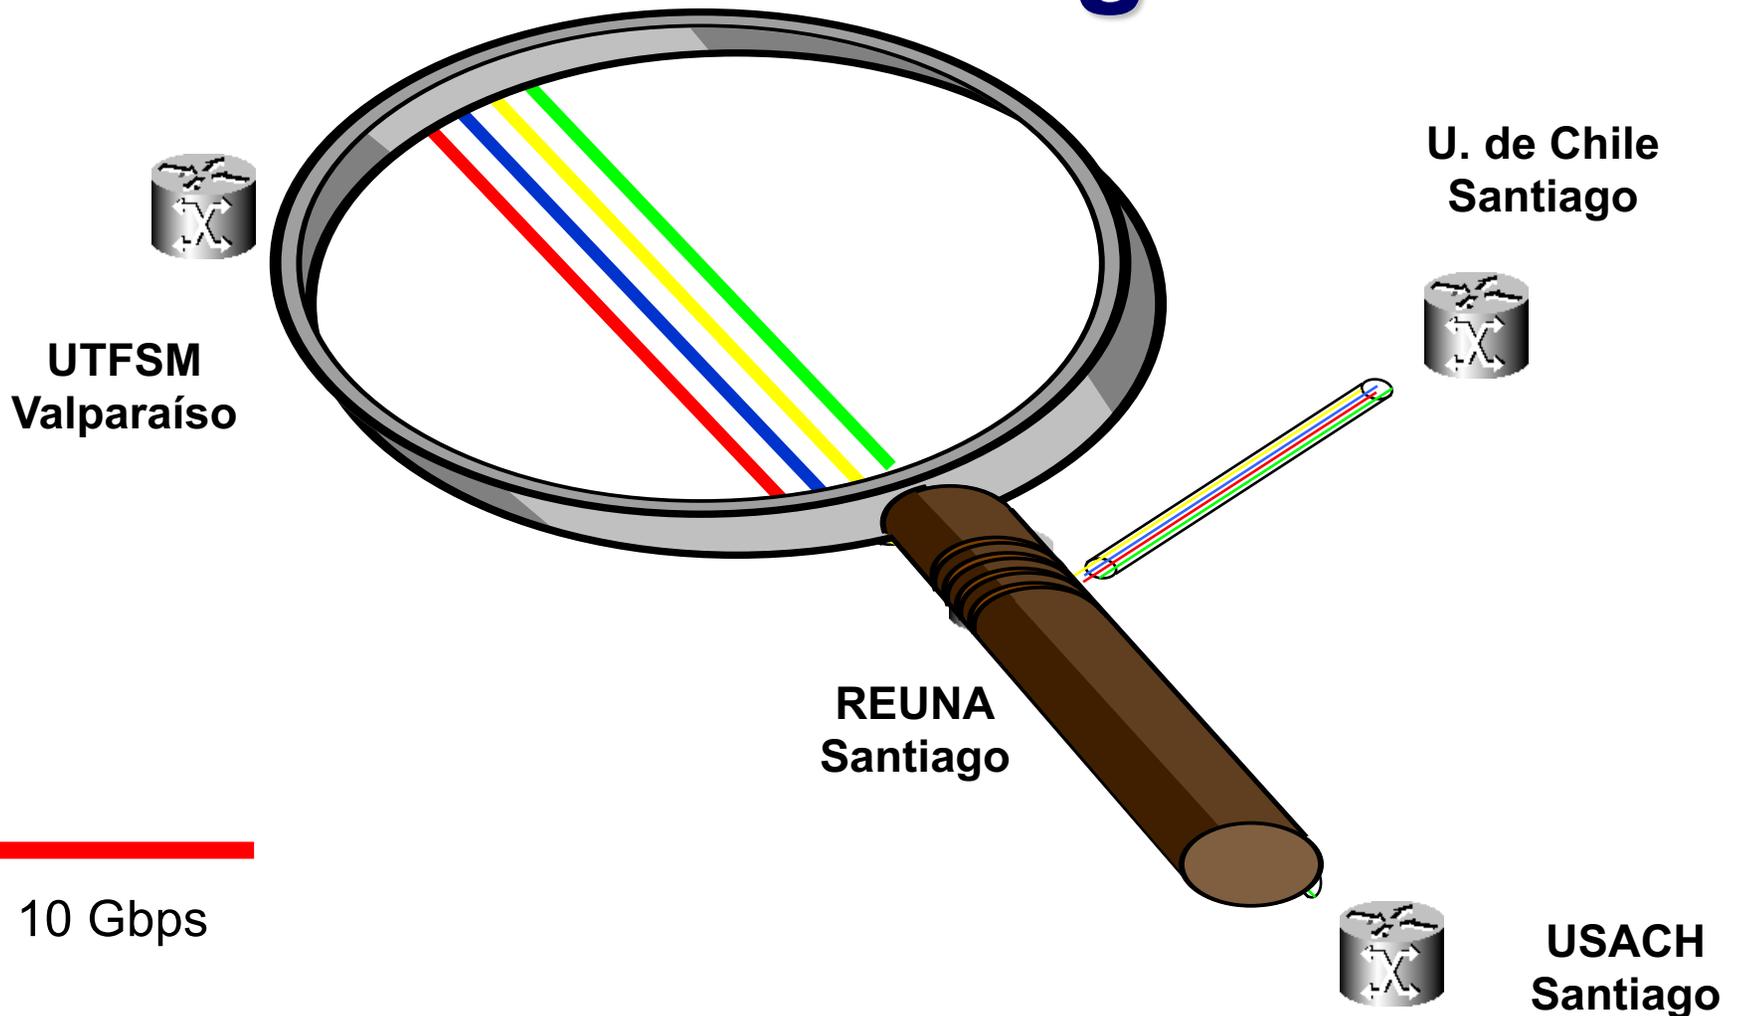

- Develop an Experimental Optical Network based on the use of WDM aiming to serve as a testbed for the research and development of new applications and services in Chile. In particular, research will be conducted in protocols, video applications, voice applications and grid type networks.

The Project

- 4 Nodes: 3 in Santiago, 1 in Valparaíso
- Dark Fiber provided from Santiago to Valparaíso (140 Km) by ImpSat
- Dark Fiber provided in Santiago by Manquehue.Net
- Institutions involved:
 - UTFSM, USACH, U. de Chile, UTA, UFRO, REUNA
